Several hook configurations available

Doublers Strap™ makes it easier than ever to switch between horns of different sizes

PRESS RELEASE  
FOR IMMEDIATE RELEASE

## ***DOUBLER STRAP™ —Brings comfort and ease to instrument doubling!***

Neotech's new **DOUBLER STRAP™** is the ideal solution for musicians who play multiple horns of varying sizes. Often when playing in the orchestra pit there are only a few bars to change instruments. With the **DOUBLER STRAP™**, there's no need to take the time to readjust the length... just remove one horn from the first hook and apply the second horn to the other hook. Fast and easy! The pad features a laminated construction of neoprene, elastic reinforcement and memory foam for complete comfort during long practice sessions or gigs. With one longer and one shorter strap on a single neck pad, it's a simple matter to switch from a bari sax to an alto in just a few seconds.

The **DOUBLER STRAP™** is available with three different hook configurations; two swivel hooks on webbing straps, one swivel hook and one PVC-coated metal hook on webbing straps, or two PVC-coated metal hooks on cord straps. By keeping each strap adjusted to the length needed for both instruments, changes can be faster than ever. Take the stress out of doubling with the **DOUBLER STRAP™** exclusively from Neotech!

The **DOUBLER STRAP™** is proudly made in the USA!

Neotech continues to innovate quality products to meet the ever-changing needs of the avid musician. We proudly make our products with top-quality materials as we feel you deserve the very best!
