**PRESS RELEASE
 FOR IMMEDIATE RELEASE**

*Neotech's **SLIMLINE GUITAR/BASS/BANJO STRAPS™** offer a wide range of new features!*

NEOTECH continues to expand the **SLIMLINE STRAP™** series to make sure that we have the best fit possible for every musician. We're now offering the Banjo version in a shorter length as well as in regular and long. The expanded **SLIMLINE STRAP™** series is available in several connection options and several materials so there's the perfect look and style for everyone. We offer the straps in black webbing as well as black or tan leather. Each of these materials is combined with the comfort of high-tech memory foam for a truly unique look and feel. This enables the strap to comfortably conform to your neck and shoulders. The antimicrobial material pulls away moisture which easily dissipates while keeping you cool. The low-profile design appeals to those performers wanting a more streamlined look with a touch of class.

The **SLIMLINE STRAP™** is available in four connection options: Standard (leather connectors), Slimlock™, Banjo and Acoustic End Pin Jack. Most models are available in two lengths: Regular and Long except for the Banjo version which is available in Short, Regular and Long.

- The Standard connectors use thick, top-grade leather.
- The revolutionary patent-pending **Slimlock™** attachment system secures tightly without the bulk and rigidity of a conventional connector. A steel cam lock attaches around the guitar pin while the two-part leather construction envelopes and secures the system with touch fasteners. This unique attachment system forms an extremely secure, yet flexible nonmarring connector that can be quickly removed.
- The Banjo connectors attach with secure loop connectors that join to the main strap with strong side-release buckles.
- The Acoustic End Pin Jack version uses a custom **Slimlock™** attachment which is designed specifically for the end pin jack. As a result, the opening is a bit larger so that you can plug in directly through the **Slimlock™**. It also offers an additional loop adaptor which connects to the **Slimlock™** located on the upper end of the strap for attaching to the neck of the guitar.

SLIMLINE STRAP™ is made 100% in the USA. The Leather Series uses top-grade leather with a rich distressed oil finish for high-tech comfort with an old-school look. All you have to do now is pick the perfect combination of features that works best for you!

Neotech continues to innovate quality products to meet the ever-changing needs of the avid musician. We proudly make our products in the USA using top-quality materials as we feel you deserve the very best!
