PRESS RELEASE
FOR IMMEDIATE RELEASE

Easy to apply: simply slide over the bow end of the slide and fasten the two snaps.

Trombone Guard protects the bow end of a trombone slide from accidental bumps and scrapes.

*NEOTECH's **TROMBONE GUARD** helps prevent costly repairs of trombone slides*

Neotech continues to innovate new ways to protect valuable instruments with the introduction of the **TROMBONE GUARD**. Keep the bow end of a trombone's delicate slide safe from accidental bumps and scrapes and reduce costly instrument repairs due to a damaged side with the **TROMBONE GUARD**.

Made from soft, durable neoprene, the **TROMBONE GUARD** is easy to apply. It only takes a few seconds to slip it over the instrument's spit valve lever, then slip it over the end of the trombone slide. If the slide has a ferrule (slide bumper) there's an opening to accommodate it. The two snap closures keep the **TROMBONE GUARD** snugly in place for added peace of mind. It features a slim profile which allows it to remain in place on the instrument when the slide is put into most instrument cases. It easily covers the bow end of most Bb to Bass trombone slides measuring 3 $\frac{5}{8}$ " to 4 $\frac{3}{8}$ " (9,2 to 11,1 cm) wide. The **TROMBONE GUARD** is proudly made in the USA and is available only from Neotech!

Neotech continues to innovate quality products to meet the ever-changing needs of the avid musician. We proudly make our products in the USA using top-quality materials as we feel you deserve the very best! For more information about our products, please call 800-251-7815, e-mail info@neotechstraps.com or visit us online at www.neotechstraps.com or www.optechusa.com.
