

# MEGA ACCORDION HARNESS™

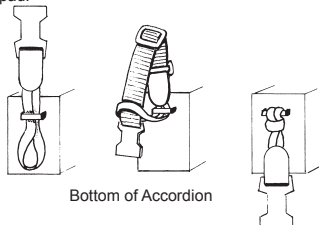

Top of Accordion

Non-Skid Surface

Fasten top of straps to accordion following illustration steps 1,2,3.

Fasten bottom of straps to accordion as follows: Unfasten quick disconnect from main strap and thread through lower connection areas as shown (4). Pass connector through loop (5) and tighten (6). Reattach quick disconnect to main strap. Overall length of strap can be adjusted at the base of the pad.

Bottom of Accordion

Step 4

Step 5

Step 6

The **MEGA ACCORDION HARNESS™** is ideal for players who require a heavy-duty strap. The unique non-skid surface keeps the strap in place so no backstrap is needed. The top of the instrument is fastened by strong nylon webbing, and the bottom utilizes our unique loop fastener with quick disconnects for easily getting in and out of the harness.

The **MEGA ACCORDION HARNESS™** transforms the accordion into a joy to play, not a burden!
