## NEW! TROMBONE GUARD

- Protects bow end of slide from accidental bumps and scrapes
- Easy to apply and snaps securely in place
- Made of soft, durable neoprene
- Fits most trombones (Bb to Bass)
- Slim profile fits in most instrument cases

The **TROMBONE GUARD** protects the delicate bow end of a trombone slide. It keeps it safe from accidental bumps and scrapes and reduces costly instrument repairs due to a damaged slide.

Made from soft, durable neoprene, the **TROMBONE GUARD** is easy to apply. It only takes a few seconds to slip it over the instrument's spit valve lever, then slip it over the end of the trombone slide. If the slide has a ferrule (slide bumper) there's an opening to accommodate it. The two snap closures keep the **TROMBONE GUARD** snugly in place for added peace of mind. It features a slim profile which allows it to remain in place on the instrument when the slide is put into most instrument cases. It easily covers the bow end of most Bb to Bass trombone slides measuring 3 5/8" to 4 3/8" (9,2 to 11,1 cm) wide.

Easy to apply and fastens securely with two snaps

### TROMBONE GUARD

## NEW STYLE! BRASS WRAP™

- Neoprene pad protects against moisture
- Non-slip backing keeps it firmly in place
- Snap fasteners allow for quick attachment or removal
- Stretches to fit your instrument
- Ultra-comfortable padding makes long sessions easier

Neotech introduces the newest member of the **BRASS WRAP™** family for baritones and euphoniums. It's a great addition to our trumpet and french horn versions!

The Neotech **BRASS WRAP™** is the ideal accessory for those in marching bands or performers playing in a long gig. The neoprene **BRASS WRAP™** fits snugly on the instrument so that you get a firm and comfortable grip while protecting the instrument's finish from moisture and oils in the hand. The non-slip backing keeps it securely in place while the snap fasteners allow for quick and easy removal for cleaning. The ultra-comfortable pad reduces grip fatigue and makes playing for long periods a pleasure, not a pain. **BRASS WRAP™** insulates your hand in both cold and hot weather while protecting against moisture so that you're always assured a secure grip. This unique wrap keeps your instrument's tone pure and your grip happy. Give your instrument a wrap!

# New for 2020

## NEW! HOLSTER HARNESS™ – TUBA

- Unique holster system supports the bow of the tuba while standing, marching or seated. The holster section is comprised of rugged ballistic nylon laminated with protective padding and a soft, nonmarring fabric interior.
- Neoprene shoulder harness completes the design by keeping the weight of the instrument off the neck and evenly distributed across the shoulders
- Fully adjustable for a custom fit.

Neotech's **Holster Harness™ – Tuba** offers an innovative support system for playing the tuba in the standing or seated position. The rugged ballistic nylon holster supports the instrument's bow while the neoprene shoulder yoke disperses the weight across the shoulders. An upper strap fastens to the instrument's tubing or strap ring for added stability. This strap connects to either side of the harness to accommodate the playing position of most any instrument. The length of the harness adjusts independently on each side allowing you to create the fit and angle that's most comfortable. Best of all, it only takes a few seconds to put on or take off. Try the **Holster Harness™ – Tuba** today!

## NEW STYLE! MEGA STRAP™ & SLIMLINE

Neotech now offers shorter versions of our two most popular banjo straps, the **MEGA STRAP™ SERIES** and the **SLIMLINE STRAP™ SERIES**. Designed to accommodate smaller performers who find a regular strap to be just a bit too long. These straps utilize our **NEO-LOOPS™** connectors for fast-and-easy attachment and removal of the strap.
